My roof is beautiful again! The Camelot team did a great job working with the insurance adjuster and company to get maximum benefits. They were communicative throughout the entire process. The new roof was installed quickly and professionally. Highly recommended!!

From the first time Ritchie with Camelot reached out he was very informative and willing to help! He was able to help get our roof repaired in a timely matter and managed to help make a very stressful situation much easier for us. I had issues with my insurance company and Ritchie made sure that my home was taken care of and was always available to answer any questions. When the Camelot crew came to install my new roof they were all really professional and did an exceptional job!

We are very pleased with Camelot Exteriors. From the moment they arrived at our door, they were very professional and polite. Camelot was very informative of their company and their experience. Their team was present when the insurance appraiser scheduled his appointment, and they made sure all our damage was noted and addressed by the appraiser. The scope of work they gave for our roof and gutter repairs was clear and understandable, as was the contract we signed for their service. The roofing crew was punctual, polite, respectful of our property, and extremely hard working, especially in the heat. They were neat in their work environment and made sure to collect all debris from our property when they left. Our experience of having a new roof put on was stress free. The sales team took care of all the paper work and interacted with our insurance company. We are very happy we selected Camelot Exteriors to replace our roof. We love our new roof, our home looks refreshed. We highly recommend Camelot Exteriors to anyone who would like a professional stress free job done.

When the storms hit last year Camelot was there to help me from start to finish with the entire process. They made it as stress free as it could be. I would recommend Camelot to anyone who has storm damage.

One person I will never forget is the salesman who made sure this whole process went smoothly, Richey. He came out and gave me a quote to roof my home and repair my skylights. However, because of all his knowledge, I was able to get a new roof and new skylights and my insurance paid for it all! From start to finish it was such a great experience, I would highly recommend calling Camelot and asking for Richey. And as a bonus he went ahead and cleaned my gutters. Everyone was so nice and professional!! Thank you so much :)

I had recent damage to my roof and gutters from the great OKLAHOMA weather and when I called Camelot and Richie came out to go over all the damage, I knew right away I was in good hands. He was so knowledgeable, helpful, on time, & answered all of my questions with answers that even I would understand. I really appreciated how professional and quick the work was completed. I would definitely use them again, just make sure you ask for Richie!

As soon as I signed up to have my roof done it turned cold and Camelot informed me that you should not put a roof on until it was above 45°. because there's issues of it not sticking down. I did see other roofing companies putting roofs on & it was under 45°. so as soon as it got above 45 degrees Camelot was here and had everything done in 2 days. I was very impressed with them and they cleaned up after themselves and everything's been fine since. I would definitely use them again.

From the very first day that Ritchie knocked on my door they were extremely helpful! He took care of the insurance process from beginning to end and made something that was very overwhelming to me a piece of cake. My new roof looks amazing and I would use them again in a heartbeat... just hopefully not too soon 😊.

We experienced a leak around some flashing on our roof. Camelot Exteriors came out to take a look and were able to fix it on site that day. They were very friendly and professional. We have not had any issues from the repair.
